

MG-COLLECTION

The ultimate innovation for professional microneedling, perfectly blended for targeting the signs of ageing, scarring, pigmentation, acne & problematic skin conditions

TARGETS SIGNS OF AGEING | SCARRING | PIGMENTATION
ACNE & PROBLEMATIC SKIN CONDITIONS

Dermapenworld™

MG-GLIDE™

PROFESSIONAL SOLUTIONS

Our ready-to-use Meso-Glide™ vials combine convenience with high-performance formulas. Each vial is designed to target specific skin concerns like ageing, dullness, scarring, and acne.

Powered by HylaFuse™ Hyaluronic Acid, they deeply hydrate the skin, helping to smooth fine lines and leave the skin plumper and more radiant.

MG-R.A.S.™

Helps reverse the signs of ageing & scars

This Reverse Ageing & Scars (R.A.S.) formula contains a powerful blend of antioxidants, vitamins, peptides, and botanical extracts known for their anti-ageing effects. MG-R.A.S.™ features Retinaldehyde, one of the most active forms of retinoid (Vitamin A) available without a prescription. It visibly reduces discolouration, fine lines, wrinkles, and rough skin.

MG-BL™

Brightens uneven skin tone

MG-BL™ helps reduce the appearance of unwanted pigmentation, including age spots, sunspots, melasma, and dark marks associated with certain scars. HylaFuse™ technology delivers deep hydration along with natural skin brighteners and tyrosinase inhibitors to help slow melanin production.

Applying pigment-sedative BL & protective COVER RECOVER sunscreen is recommended to help clients with stubborn hyperpigmentation achieve the best results

MG-CLR™

Helps clear skin & address problematic skin concerns

Antimicrobial peptides and bio-compatible extracts combine to help clear problematic breakouts and enhance the visible complexion of skin troubled by acne, blackheads/comedones, open pores and oily skin.

The MG-Collection allows you to deliver the right combination of skincare ingredients with cutting-edge technologies to deliver biocompatible actives into the skin for exceptional results.
